Subject: HHC TWG- Regional Information
Attachments: 895865-idm-1997.pdf; Subsistence_risk assessment_w_appendix.pdf; Notes on peer review of IDM 1997_02_23_16.docx; Regional Subgroup_Mtg Notes_02_16_16.docx

Good Afternoon,

With all of the discussion we have been having around potential regional schemes and development of a HHC Regional Subgroup, I wanted to share a few items with you for consideration.

1. The IDM Consulting paper has been referred to previously as Dr. Nobmann's 1997 work on subsistence exposure scenarios using the ADF&G Harvest Database. This document is also referenced in the DEC Literature Review;
2. The second document is a summary of a poster presentation conducted on Dr. Nobmann's work;
3. The third document are some notes I gleaned from the peer review comments on Dr. Nobmann's work. I am afraid that I only have a paper version of this document but if there is specific interest in seeing the comments, I can make an effort to scan and send them to you; and
4. Finally, the last are some simple notes taken from the Regional Subgroup Mtg. As stated in the notes, additional conversations on this subject will take place once Jim's paper has been published and made available to the public.

Please note that no decisions on whether to use a regional approach or not has been made by DEC. This information is designed to help generate discussion on pros/cons and options for the state to consider.

Feel free to contact me if you have any additional questions or concerns.

Thanks,

Brock Tabor
